

IN THE SPECIFICATION:

Please amend the paragraph which begins on line 3 of page 12 of the Specification to read as follows:

- Typically, the application program is resident on the hard disk drive 610 and read and controlled in its execution by the processor 605. Intermediate storage of the program and any data fetched from the network 620 may be accomplished using the semiconductor memory 606, possibly in concert with the hard disk drive 610. In some instances, the application program may be supplied to the user encoded on a CD-ROM or floppy disk and read via the corresponding drive 612 or 611; ~~or alternatively may be read by the user from the network 620 via the modem device 616.~~ Still further, the software can also be loaded into the computer system 600 from other computer readable storage media medium including magnetic tape, a ROM or integrated circuit, a magneto-optical disk, a radio or ~~infra-red transmission channel between the computer module 601 and another device;~~ or a computer readable card such as a PCMCIA card; ~~[[.]]~~ The foregoing is merely exemplary of relevant computer readable storage media. Other computer readable storage media may also be used. The application program may alternatively be provided to computer module 601 from remotely-located computer readable storage media via radio or infra-red transmission channel, by the user from the network 620 via the modem device 616, [[and]] or the Internet and Intranets including e-mail transmissions and information recorded on Websites and the like. The foregoing is merely exemplary of relevant computer readable media. Other computer readable media may also be used:-
